

ROTZLER Equipment for Recovery and Rescue Vehicles

Strong Accessories for Safe Operations

ROTZLER has been developing winch systems and accessories for recovery and rescue operations for many decades. To this end, our specialists develop tailor-made solutions in cooperation with vehicle manufacturers and operators. From covers for rope trumpets to rope lugs, ROTZLER provides useful accessories for rope deflection, doubling the pulling force, securing vehicles and much more. ROTZLER accessories are the ideal complement for ROTZLER winches. Products are available individually or as a system pack and are quick to mount. ROTZLER's tested brand quality is a guarantee for the highest degree of safety and a long service life. For quick, safe and successful operations, ROTZLER winch accessories are hard to beat.

ROTZLER – Strong Winches, Strong Accessories

Deflection Unit

Counter support

ROTZLER Deflection Unit

- For double pull to the rear and single pull to the front
- Simple and quick conversion for rope deflection
- System with removable snatch block and rope trumpet
- Counter support for double pull (fixing device)
- Attachment to the vehicle saves having to find an anchor point
- Various models for differing pulling forces
- Snug and space-saving integration into any vehicle frame

Rope Trumpet

ROTZLER Rope Trumpet

- For diagonal pulls under full load (up to 25°)
- Quickly replaceable wearing parts made of high-quality plastic
- Versions for differing pulling forces
- Lightweight, compact, space-saving
- Patented in Europe and North America
- Also available as a system in a ROTZLER deflection unit

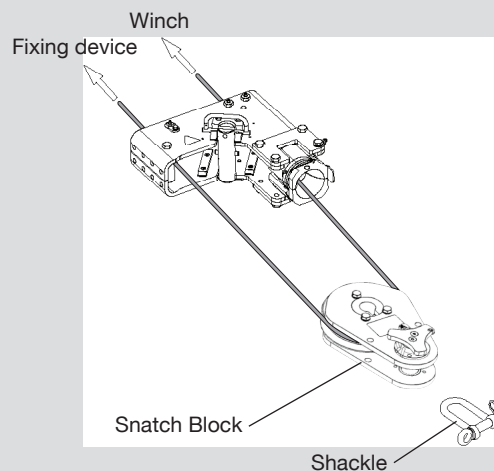

Snatch Block

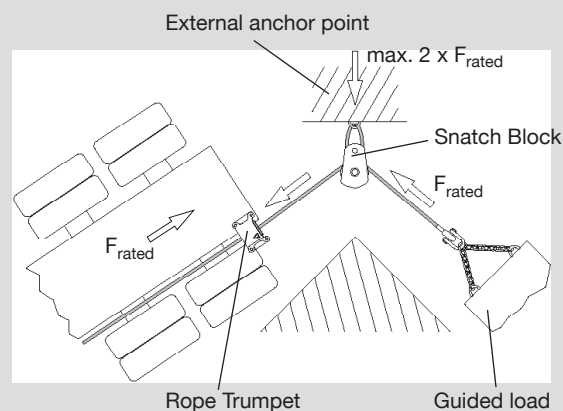

ROTZLER Snatch Blocks

- For rope deflection and doubling the pulling force of the winch
- Versions for differing pulling forces and rope diameters
- Quick and easy to mount by just a single person
- Large roller diameter lengthens the service life of the rope
- Reduction in weight thanks to optimised materials
- Perfect system in combination with ROTZLER winches

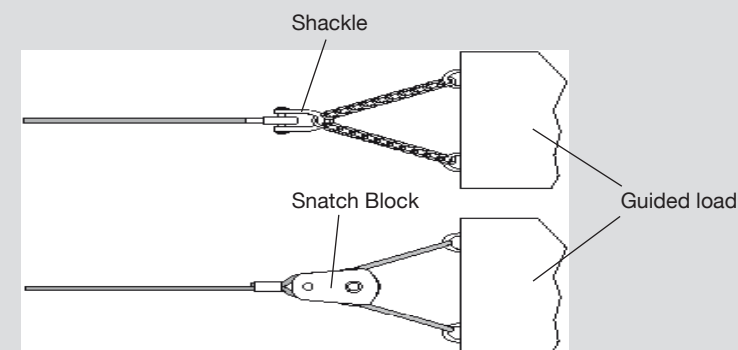

Double pull to the rear with deflection gear

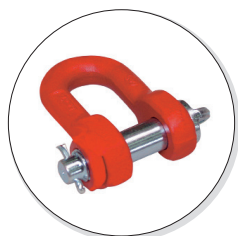

Deflection of the rope pull direction

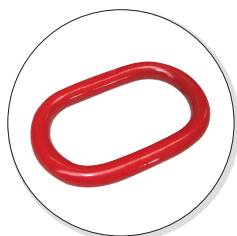

Attaching the load to the wire rope

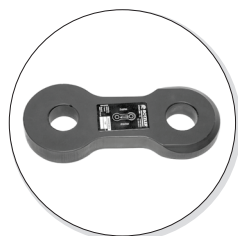

Shackle

Master link

Rope lug

ROTZLER Load-securing Gear

- Shackles to link the winch rope and the extension rope
- Master links in accordance with DIN 5688-3, Form A
- Rope lugs for double pull in combination with a snatch block (model for 140 kN)

Wheel wedges

ROTZLER Wheel Wedges

- For securing the vehicle during winch operation
- Made of solid steel, suitable for high loads
- For optimum and safe winch operations
- Two sizes (effective pulling forces up to 60 kN and > 60 kN)
- DIN 14584-compliant version for operating pulling equipment

Oil Tank

ROTZLER Hydraulic Oil Tank

- Standard version with small tank volume (30 l)
- Inclusive of oil cooler, bleeder, oil filter and soiling gauge
- Space- and weight-saving thanks to small oil volume
- Reduced maintenance costs due to reduced oil quantity
- Optional tank console for securing the tank
- Easy adaptation to suit differing chassis
- Special models on request

Rope

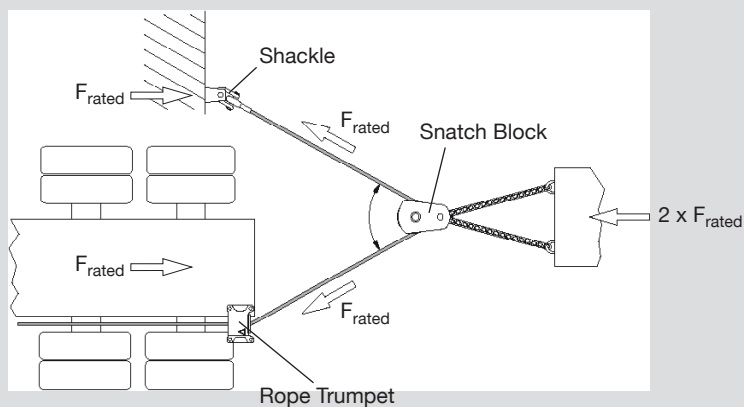

Extension rope

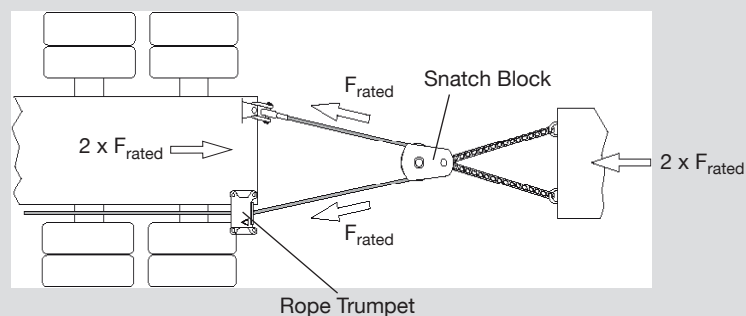

ROTZLER Ropes

- Numerous versions to suit ROTZLER winches
- Extension ropes to link up the winch rope and the load
- Standard-compliant and reliable

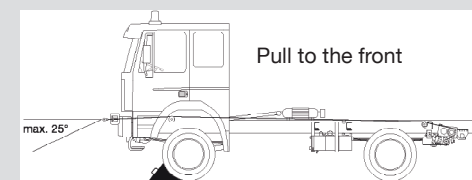

Doubling the pulling force by attachment to an external anchor point (double pull)

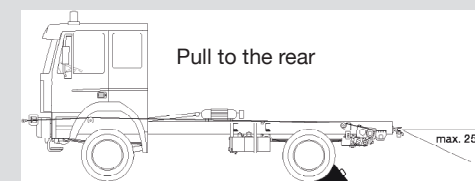

Doubling the pulling force with a second anchor point on the chassis (double pull)

Securing the vehicle with wheel wedges

wheel wedges

wheel wedges

Higher performance and safety during recovery and rescue

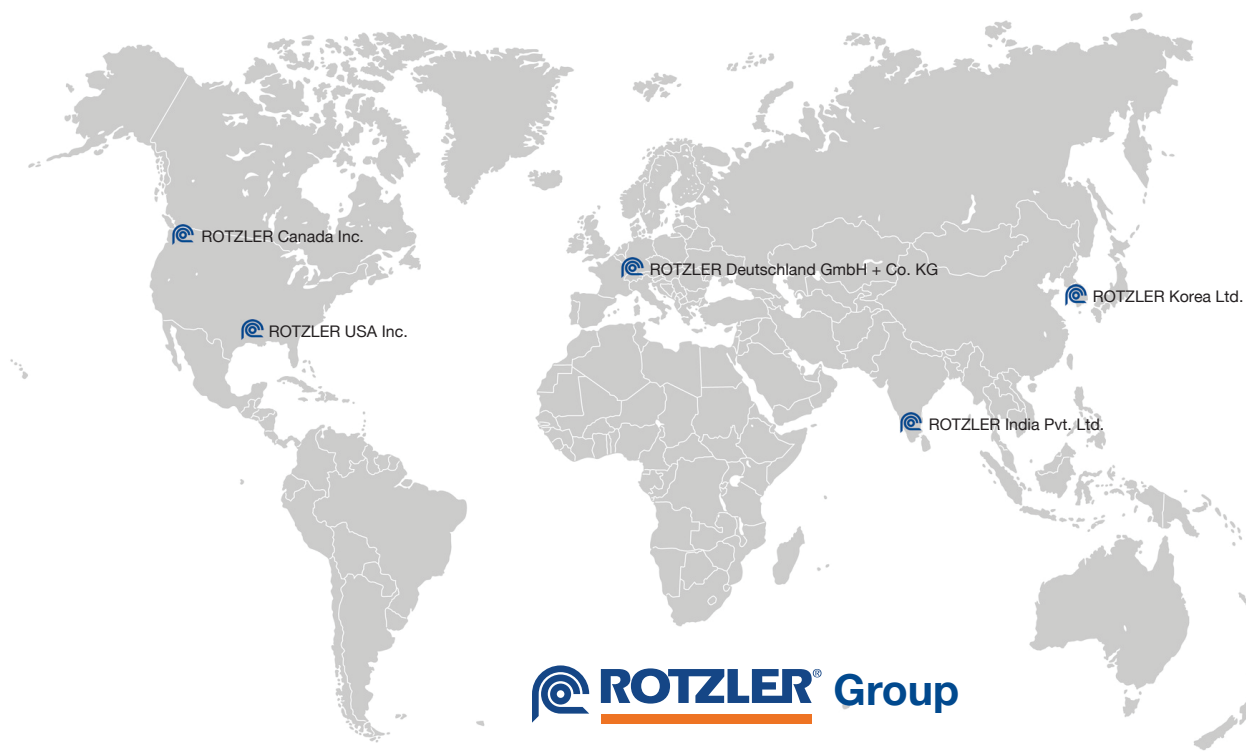

ROTZLER – The Perfect System for Recovery Winches

ROTZLER equipment saves time and is a safe and reliable aid to successful operations.
Perfect integration into vehicles as well as quick and easy operation are decisive benefits.

Robust load-securing gear, compact deflection systems, patented rope trumpets:
individually or as a system, ROTZLER accessories are the perfect complement for TREIBMATIC or HZ winches.

Immer einen Zug voraus – mit dem ROTZLER-System für das Rettungswesen.
