

ROTZLER
Solutions for Loading Cranes

ROTZLER WINCHES

ROTZLER is one of the leading manufacturers of high-performance winches for hoisting loads and has developed special compact hoisting winches for installation in loading cranes. The special technical functions of these winches extend the application possibilities and maximize the performance of loading cranes, especially in demanding environmental conditions.

ROTZLER hoisting winches are particularly suitable for loading cranes used for:

- Construction purposes
- Material transport
- Towing trucks
- The marine industry

ROTZLER – Strong Winches, Strong Partner

Almost 100 years of experience in hoisting winch production make us a competent and reliable partner for the loading crane industry. In cooperation with renowned international crane manufacturers, we develop optimized winch solutions for real-life situations. As a result, ROTZLER stands for products that guarantee simple and safe operation while also maximizing operational efficiency in this market sector.

Effective material handling at the building site

Loading Cranes for Construction Purposes

The exact positioning of loads plays a crucial role in ensuring smooth working procedures.

ROTZLER hoisting winches help to satisfy these requirements both simply and efficiently. In addition, they reduce the effort involved during operational use and also minimize wear of the crane.

Time- and work-saving

Loading Cranes for Material Transport

ROTZLER hoisting winches are a great choice when it comes to quick material transport, even if longer distances have to be covered.

Hoisting winches make a decisive contribution to safe and effective material handling, especially in the construction industry.

Simple spot-on positioning

Reliability under extreme environmental conditions

Loading Cranes for the Marine Industry

Due to the extreme operating conditions, these cranes have to provide reliable and highly effective equipment. In all of this, safety is a key criterion for success and cost-effectiveness.

ROTZLER hoisting winches can be relied on to provide outstanding performance and reliability at sea and on land all over the world. In practice that means more flexibility, time savings and higher productivity.

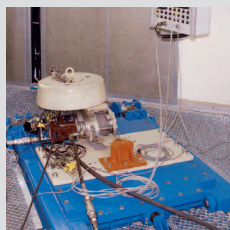

ROTZLER WINCHES – Make Light Work of Hoisting Loads

Higher productivity and diverse application possibilities are just two good reasons to mount hoisting winches on loading cranes. The efficiency of cranes can be decisively maximized by installing ROTZLER hoisting winches. As highly useful crane equipment, they also ensure safe and efficient working procedures. ROTZLER's comprehensive range of hoisting winches and convenient accessories provide solutions of the highest standard for the most diverse applications.

International crane manufacturers and operators place their trust in this strong performance profile and the innovative safety functions of our products.

Quality and Performance – Plus Safety

The unique Steinen test center, which was specially designed and built by ROTZLER for the purpose of conducting winch tests, is used to simulate the typical conditions of hoisting winch operations. Around-the-clock service life tests guarantee the reliability, safety and efficiency of ROTZLER winches. This is something our customers can rely on – worldwide.

Signs of exceptional product quality

ROTZLER Safety+

Special product-specific functions stand for superior safety standards.

ROTZLER Performance+

Outstanding performance thanks to ongoing R&D.

ROTZLER Operation+

Simplified winch operation due to optimized control elements.

ROTZLER Value+

Extremely cost-efficient due to premium quality and long product service life.

ROTZLER Optiweight+

Weight-optimized concepts for customized solutions.

ROTZLER Service+

Service-friendly products due to extensive diagnosis functions and innovative maintenance concepts.
