

## Special instruction for large Recovery Vehicles

### Seminar objective

You are well-versed in the operation of a large recovery vehicle with several ROTZLER subsystems.

Now you would like a thorough instruction from the winch unit's manufacturer to securely and quickly apply its functions.

### Target Group

Operators of winch units of the ROTZLER TREIBMATIC, HZ and Titan series.

Operators and maintenance staff

### Benefits

You know the properties of a ROTZLER winch unit in the vehicle. You are familiar with the functions - from the hydraulic system to the special features of a rope guidance to use of all accessories such as facilities for double pull.

You can securely operate the multifunction operating unit and have mastered all functions of the winch unit on the recovery vehicle.

Additionally, you will learn everything about the causes of possible status and error messages on the operating unit.

### Content focuses and learning objectives

- ROTZLER scope of delivery with all partial systems at a glance
- Safe use of pulling and hoisting ropes
- Explanation of the functions of the multifunction operating unit, such as
  - Operation of the recovery supports
  - Operation of the winches for pulling or lifting
  - Operation of the towing / underlift device
  - Correctly understanding the causes for status and error messages
  - Operation of the emergency operating unit

### Performances and contributions of the participant

- Vehicle ready for inspection and road licensing, including driver/operator
- Know-how for proper attachment and recovery of heavy loads
- Good access to winch(es) and the rope course
- Training room with projector and workshop environment with pit

### Appointment

by agreement

min. time requirement 8 hours

### Venue

at customers premise  
(alternatively at Steinen)

### Attendance

maximum 6 participants
