

Instruction into the winch unit

Seminar objective

All colleagues are looking forward to finally taking the new ROTZLER winch unit with the new vehicle into operation!

To use all functions of your winch unit safely and quickly, you would like a thorough instruction from the unit's manufacturer.

Target Group

Operators of winches of the ROTZLER TREIBMATIC, HZ and Titan series.

Maintenance staff and operators, e.g. at fire brigades.

Benefits

You know the properties of a ROTZLER winch unit in the vehicle. You are familiar with the functions - from the hydraulic system to the special features of a rope guidance to use of all accessories such as facilities for double pull.

Safe use of the operating unit, as well as extending and retracting of the rope under load are no problem for you anymore.

Additionally, you will learn everything about the causes of possible status and error messages on the operating unit.

Content focuses and learning objectives

- Safety, operating manual, service manual and spare parts list
- Overview of the winch unit
- Rope
- Hydraulic system
- Operating unit and emergency operating unit
- Sensors and monitoring switches
- Can rope damage be avoided?
- Are simple status messages recognized correctly?

Performances and contributions of the participant

- Vehicle ready for inspection and road licensing
- Experience in safe movement of heavy loads

Appointment

by agreement

time required ca. 4 hours

Venue

at customers premise
(alternatively at Steinen)

Attendance

maximum 12 participants
